Either way, this initial starting point is a great foundation for advanced image editing.. San Diego, CA (PRWEB)September 12, 2017 Macphun, the California-based software developer known for making complex photo editing tasks simple and fun, today announced the start of their pre-order for Aurora HDR 2018 for Mac and Windows.. “The original Aurora HDR quickly became the industry standard for HDR photo editing on Mac and the new version is even more innovative and powerful than its predecessors,” said Kevin La Rue, Vice President at Macphun.

Another major improvement to Aurora HDR 2018 is the new HDR Enhance Filter A single slider adds details and clarity to an image, adjusting colors, details and contrast without creating artificial halos or other problems.. “With Aurora HDR 2018, we’ve introduced the next-generation of tone mapping for superior natural results, plus long-awaited lens correction and transform tools that allow users to create perfect HDR images,” La Rue concluded.. com Co-developed with renowned HDR photographer

Trey Ratcliff, new Aurora HDR 2018 is available for the first time ever for both Mac and Windows users.. New users can purchase Aurora HDR 2018 for \$89 and current users of Aurora HDR may upgrade at a special price of \$49 at aurorahdr.. NEW: Lens Correction Tool* – The new Lens Correction filter easily fixes all kinds of lens distortion, from barrel and pincushion to chromatic aberration and vignetting.. When merging brackets, the algorithm analyzes each image separately, automatically detecting dark and light zones and adjusting the level of detail which will produce a very natural looking HDR image.. NEW: Mac and Windows versions – Aurora HDR 2018 is available both for Mac and PC users, enabling mixed-computer households to share the same product key.. Aurora HDR 2018 has a completely new and smarter algorithm for tone mapping single or multiple exposures that results in the most realistic starting image possible. cea114251b [Kendrick Lamar Sing](#)
